“Fabrication of an Overdenture Bar”

For better dentistry

DENTSPLY PROSTHETICS

CERAMCO-TRUBYTE-AUSTENAL

Overdenture bars offer patients one of the best ways to stabilize a denture. However, these bars have always been a challenge for the dental laboratory. To ensure success, these overdenture bars must have a passive fit and ultimate precision, and this can be difficult using traditional laboratory procedures. This presentation will discuss the complete laboratory process, various types of bars, and how they can be accurately fabricated using new CAD/CAM technology. You will learn how this new technology takes away the guess work, and the risk of processing an overdenture bar.

Wednesday, February 10, 2010 • 7:00 p.m. – 9:00 p.m. (Dinner Included)

Buena Vista Palace, Orlando, Fla.

Approved for 2 Hours of CDT/RG Scientific Credit

Registration Form for FDLA Orlando Clinic & Dinner – February 13, 2010
